

# ZEYAD MOHAMED

DATA ENGINEER

## PROFESSIONAL PROFILE

I'm a Python developer with a strong focus on data engineering and automation. I specialize in extracting and transforming data from online sources into structured formats, and building pipelines to support analytics. I'm experienced with tools like Airflow, Spark, and SQL, and passionate about creating scalable data workflows that turn raw data into valuable insights.

## WORK EXPERIENCE

### Python Automation Engineer - IceCode

As a Python automation engineer, I help IceCode automate complex tasks and extract valuable leads through web scraping, including sources like Google Maps and Yellow Pages. and deliver the leads through their custom CRM

### Python Web Scraper - Upwork

Freelancing on Upwork has allowed me to collaborate with clients from diverse industries, tackling unique challenges and delivering tailored solutions. Client satisfaction, reflected in their positive feedback and 5-star ratings, has been the most rewarding aspect, confirming the value I bring to their projects.
